Background

Hyacinth arrived in Kepler Station, a mining outpost orbiting the gas giant Oryn 19 years ago after leaving Redgate under circumstances Hyacinth describes differently every time. The first job was hauling for the Oryn Extraction Consortium; the second was the one that stuck. Today Hyacinth works as a radio operator near the hydroponics bay and is paid, when paid at all, in station credits.

Hyacinth learned the trade from Amadou Lindqvist, who still drops by unannounced. The longest-running feud in Hyacinth's life is with Mara Ravensworth, over a matter neither will explain. The person Hyacinth trusts most is Anouk Stillwater.

Current goal: to be trusted by the Oryn Extraction Consortium again. Greatest fear: a knock at the door after dark.
